Joint Safety Committee

Met February 24th and March 10th

Discussion still on the table

Discussion on Barrier Doors for drivers they are installed in two buses. We need drivers to give feedback on this after they are driven to see it, they should be installed on all the buses. The Union saw buses from Toronto with bus barriers the do not block windows. Management has reached out to Toronto bus company to see if these can be installed on our buses.

Discussion on E Mirror program. They are installed in two buses; we need drivers input on any issues and if they are liked. Ken Hebert is putting together a survey. Please fill out, with any suggestions and concerns

Discussion on Nova bus seat replacement and rotation on blocks. Two buses have had the seats replaced. Still waiting on larger order to come in. Orders have started to come in. All buses should have seats replaced by the end of June. Seats started to arrive in February at two per week.

Discussion on Safety Hazards and supervisor complaints being responded to in a timely manner. This is still an issue. The Union feels it is not happening fast enough.

We had two biohazards this month. We felt the buses should have been changed off immediately when there is blood vomit and urine and feces that can be in direct contact with driver or passengers, this is unsafe. Company agrees and is now retraining radio of the proper procedure in these cases. The company states that biohazards in drivers

area will be changed off and or towed back to property

We had discussions on the cleanliness of the busses, especially outside marker lights and windows. We feel if you can't see or see our safety features this is an issue. Company says they are working on a plan to rotate buses in and out of the garage when temperatures are below freezing so that every bus is thoroughly clean each week.
